

Yogesh

I am Yogesh, an ex-student from Garden School. I was just 5 years of age when my mother, a rag picker garbage collector approached Mother Felicity. I came from a poor family. I had no money. My parents lived in real poverty. They struggled very hard to bring me up. After studying Class two in the Garden School, as they had no further classes, I was the lucky one to be chosen for sponsorship.

My mother was glad. I completed my school in St. Michaels at Mahim. My fees and all other activities was paid by Prem Dan till class10th. After I passed my SSC with good percentage, I did my Diploma. I completed my Degree in Engineering in Automobile. My uncle and my parents financed me for this course.

I am grateful to Prem dan my sponsors and my parents who struggle to get finance and has supported me till date. I worked for 1 year after my degree since I was paid less, I decided to look out for a better job with good income. I thought I would free my parents from working and now it is my time to support them. I have bloomed well. I got the fruit of all my hard work and struggle.

I thank Prem dan and my parents for supporting me all through these years.
